

Smart Camera

User Manual

Model: SMART-C

Thank you for purchasing the Smart Camera. Installation will be easy and take about 10 minutes to complete.

1 Introduction

The Smart Camera is a companion device to an existing garage door opener which makes your garage door be smarter and securer. It allows multiple users to control and monitor their garage door remotely.

Before you start, you MUST have

- A router with 2.4GHz Wi-Fi® frequency, configured with 802.11 B/G/N, and within 50 ft. to provide a stable Wi-Fi network environment. 
- Mobile phone needs to connect to your home Wi-Fi network, and with the latest version of the Smart Camera App.
- Compatible garage door opener(see Step 1)

The following tools will be used probably:

- Screwdriver 

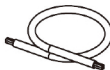

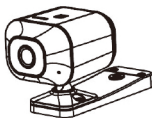

- Stepladder

2 Contents of the box

The Smart Camera box is packaged with the following parts:

- Smart Camera Garage Door Opener
- Screws
- Cable
- User Manual

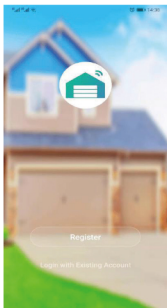

3 Installation

Step 1 Check Compatibility

1. Make sure that your Garage door opener is equipped with 12V-24V AC/DC interface.
2. Make sure your Garage door opener is equipped with push button.
3. If meet the above conditions, your Garage door opener will be compatible with doorsmart.

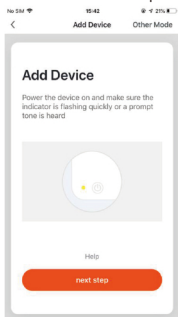

Step 2 Install the Smart Camera App

Download and install "Smart Camera" App from the Google Play or Apple App Store, or scan the QR code below to download. Install the App and register an account.

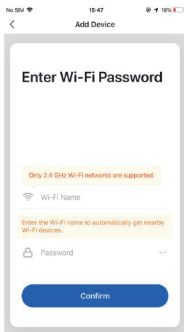

Step 3 Add Smart Camera device to App

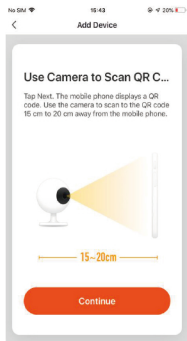

- Make sure your phone have connected to a Wi-Fi router or a Wi-Fi hotspot which can access to internet quickly.
- Plug your Smart Camera device to an outlet, the device will power on automatically, the LED blinks with red color twice per second. If the light is not flashing, open the back cover, press and hold "Reset" button for 10 seconds until the light starts to flash. The device is now on Standby Mode and trying to connect to the Wi-Fi network.
- Launch the App, press the "Add Device" or "+" to start adding a device, and select "Smart Camera" and tap "next step"

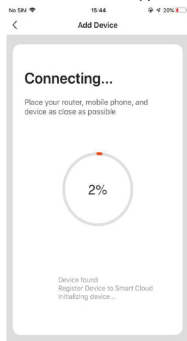

- Select your Wi-Fi network and enter the password, then tap "confirm"

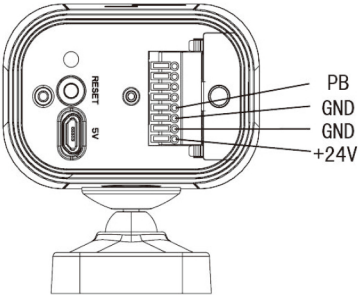

- Tap "Continue", the mobile phone will display a QR code, use your device to scan the QR code 15cm to 20cm away from the mobile phone.

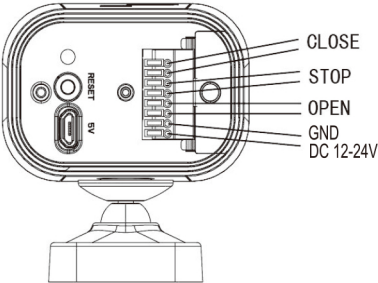

- When you heard a prompt, tap the "I Heard a Prompt", and wait for the setup to complete, then the device will appear to your "Home".
